

The **Business** Growth & **Transformation** Partner.

Pitchvilla Consulting Group brings together 200+ experts, including professionals with experience across McKinsey, BCG, Bain, Big 4 firms, and leading organisations. Our multidisciplinary network covers strategy, finance, marketing, sales, technology, operations, and transformation giving clients access to specialised expertise on demand, sharper decision-making, practical solutions, and execution support to accelerate growth and create measurable business impact.

INDUSTRIES Startups & Entrepreneurship, Education & EdTech, Aviation & Travel, Food & Hospitality, Technology & AI, Retail & Consumer, Real Estate, Healthcare, Media & Entertainment, and Professional Services.

DOMAINS: Business Strategy, Marketing & Branding, Sales & Revenue Growth, Finance, Fundraising, Technology & Digital Transformation, Operations, HR & Organisation, Franchise & Expansion, and Business Restructuring.

Every business reaches a stage where growth demands a **different approach.**

What worked when the business was small may not work when the business begins to scale.

The founder who once managed everything personally may now need a management structure.

A sales process that worked at ₹1 Crore may not work at ₹10 Crore.

An informal operation may need systems.

A successful local business may need a completely different architecture before expanding nationally.

And a business looking for investment needs to be able to withstand investor scrutiny.

Growth therefore **requires more** than increasing revenue.

It requires the business to evolve across:

01 Strategy	02 People
03 Processes	04 Finance
05 Technology	06 Sales
07 Operations	08 Leadership

This is where Pitchvilla comes into Action.

We **help businesses** move from their current state to their **next stage**.

Pitchvilla Business Consulting Group works with founders, SMEs and growth-stage businesses to identify business challenges, evaluate opportunities and develop strategic pathways for growth, restructuring, expansion and transformation.

WE TYPICALLY WORK WITH BUSINESSES LOOKING TO

Restart or accelerate growth

Restructure an existing business

Professionalize management

Expand geographically

Launch a new business or vertical

Build a franchise model

Prepare for fundraising

Improve investor readiness

Introduce technology and automation

Build stronger sales and revenue systems

Reduce founder dependency

Prepare the organization for scale

Five kinds of **businesses** we work with.

01

Startup founders

Founders who have an idea, early business or growing venture and require strategic clarity.

02

Growing SMEs

Businesses with established operations that now need stronger systems and professional management.

03

₹50 Lakh – ₹5 Crore+ businesses

Businesses entering a new phase where existing structures may no longer be sufficient.

04

Businesses preparing to raise capital

Businesses that need to strengthen their business model, financial readiness and investor positioning.

05

Businesses preparing for expansion

Businesses looking to enter new cities, markets, locations or business verticals.

Six areas of Business Challenge

A consulting engagement can originate from a specific business problem or from a broader need for transformation.

GROWTH Revenue stagnation Customer acquisition challenges Weak sales conversion Market positioning Lack of a clear growth strategy	ORGANIZATIONAL Founder dependency Unclear roles Management gaps Inefficient teams Lack of accountability
OPERATIONAL Processes that do not scale Operational inefficiencies Lack of SOPs Poor coordination Inconsistent execution	EXPANSION New market entry Geographic expansion New locations New business verticals Expansion economics
FINANCIAL & FUNDRAISING Business not investor-ready Weak financial structure Lack of financial visibility Business model concerns Investor positioning	TECHNOLOGY Manual processes Lack of CRM Poor data visibility Technology fragmentation Automation opportunities

OUR CONSULTING PRACTICES

Eight practices, each with its own set of focus areas.

Strategy, restructuring, expansion and fundraising

01

Business Strategy

We help management understand where the business stands, where it should go and what strategic choices are required to get there.

Business Model · Positioning · Market Strategy · Competitive Strategy · Growth Strategy · Strategic Planning · New Business Models

02

Business Restructuring

As businesses grow, the structure that supported the earlier stage may become a constraint.

Organization Structure · Roles & Responsibilities · Processes · Management Systems · Operational Structure · Profitability · Governance · Founder Dependency

03

Growth & Expansion

Expansion requires more than identifying a new market. It requires a repeatable model capable of supporting that expansion.

Geographic Expansion · New Markets · New Locations · New Products · New Verticals · Growth Architecture · Expansion Roadmap

04

Fundraising & Investor Readiness

Raising capital is not simply about preparing a pitch deck. The business itself needs to be ready for investor evaluation.

Business Model · Financial Readiness · Financial Structure · Investor Story · Business Plan · Financial Model · Investor Documentation · Fundraising Strategy

Expansion, technology, revenue and leadership

05

Franchise Expansion & Distribution Strategy

A business that wants to franchise needs a model that can be replicated without compromising its economics, customer experience or operating standards.

Franchise Feasibility · Franchise Model · Unit Economics · SOP Framework · Partner Structure · Revenue Model · Franchise Expansion · Distribution Strategy

06

Technology & Business Transformation

Technology should support business growth rather than exist separately from it.

CRM · ERP · AI · Automation · Dashboards · Digital Systems · Process Automation · Technology Roadmap

07

Marketing & Revenue Strategy

Growth ultimately needs a functioning revenue engine.

Go-To-Market · Sales Strategy · Lead Generation · Customer Acquisition · Conversion · Revenue Architecture · Marketing Funnel · Sales Process

08

Founder & Leadership Advisory

As businesses grow, founders need to transition from doing everything to building organizations capable of performing without constant founder intervention.

Founder Mindset · Strategic Thinking · Decision Making · Leadership · Management Structure · Delegation · Growth Orientation

We begin with the **business**, not the service

A client may approach us saying:

**“We need to
increase sales.”**

But the underlying issue may be

POSITIONING	PRODUCT	PRICING	PEOPLE
TECHNOLOGY	PROCESS	MARKET STRATEGY	

Therefore, Pitchvilla does not prescribe a solution before understanding the business. **Our engagements generally follow a structured progression.**

Five phases of an engagement

PHASE 1

Discovery

Understand the business

PHASE 2

Diagnosis

Identify what is actually holding the business back

PHASE 3

Strategic Direction

Define the path forward

PHASE 4

Strategic Roadmap

Turn direction into priorities

PHASE 5

Advisory & Transformation Support

From strategy towards implementation

01

Discovery

Understand the business. We begin by developing an understanding of the business, its current position and its objectives.

OBJECTIVE

Establish a clear understanding of the current business environment.

Depending on the engagement, this can involve:

Founder / Management Discussions

Financial Information

Existing Processes

Technology

Competition

Business Information

Organizational Structure

Sales & Marketing

Market

Growth Objectives

02

Diagnosis

Identify what is actually holding the business back. The objective is not simply to identify symptoms. We assess the underlying business constraints and opportunities.

OBJECTIVE

Create clarity around the key areas requiring attention.

This can include:

Strategic Gaps

Operational Gaps

Organizational Gaps

Financial Gaps

Technology Gaps

Market Opportunities

Growth Constraints

Execution Challenges

03

Strategic Direction

Define the path forward. Once the business situation is understood, we work with the management team to define the strategic direction.

OBJECTIVE

Translate business challenges into strategic choices.

Depending on the assignment, this may include:

Strategic priorities	Business model changes
Growth opportunities	Restructuring requirements
Expansion opportunities	Technology priorities
Revenue opportunities	Investment readiness priorities

04

Strategic Roadmap

Turn direction into priorities. Strategy needs to become actionable. The consulting engagement can therefore translate strategic priorities into a structured roadmap.

The exact roadmap depends on the client's requirements.

SHORT TERM Immediate priorities	MEDIUM TERM 90–180 day priorities	LONG TERM Strategic growth initiatives
---	---	--

The roadmap can define:

Priority

Ownership

Timeline

KPI

Dependency

05

Advisory & Transformation Support

From strategy towards implementation. Pitchvilla's core engagement is consulting and strategic advisory. However, certain business situations require continued involvement.

Where appropriate and mutually agreed, Pitchvilla may continue as:

Strategic Advisor	Transformation Advisor
Implementation Advisor	Growth Partner

This may involve periodic management reviews, specialist interventions, strategic monitoring and implementation support.

What an engagement may result in.

The exact outcome depends on the scope of the engagement.

Strategic Clarity A clearer understanding of the business and its priorities.	Business Roadmap A structured direction for the next stage.
Organizational Clarity Clearer management structure, roles and responsibilities.	Growth Architecture A structured approach to scaling revenue and markets.
Expansion Model A framework for entering new markets or locations.	Investor Readiness Improved preparation for investor conversations.
Technology Roadmap Identification of systems and automation required for scale.	Execution Priorities Clear priorities for management to act upon.

Five Engagement Formats

FORMAT	DURATION	SCOPE	INVESTMENT
Strategic Business Diagnosis	4–6 Weeks	Focused assessment of the business and its strategic priorities.	INR 50k – 150k
Strategic Consulting	6–8 Weeks	Structured consulting around a defined business challenge.	INR 2–5 Lakhs+
Business Restructuring	10–12 Weeks	For businesses requiring significant organizational, operational or structural intervention.	Customized
Growth & Expansion Strategy	5–6 Weeks	For businesses preparing for a new stage of growth or expansion.	Customized
Strategic Partnership	1 Year or More	Ongoing strategic advisory and transformation support.	Customized

Every business is **different.**

Therefore, Pitchvilla does not recommend a standard consulting package before understanding the client's situation.

01

Initial Discussion

Understand the business and the reason for approaching Pitchvilla.

02

Requirement Understanding

Identify the areas requiring strategic attention.

03

Engagement Definition

Agree on the scope, objectives and expected outcomes.

04

Proposal

Pitchvilla presents a client-specific consulting proposal.

05

Engagement

The consulting team begins the agreed assignment.

We don't believe in generic consulting.

Every business has its own:

Market

Founder

People

Economics

Customers

Challenges

Opportunities

Therefore, the consulting approach must be designed around the business.

The problem determines the approach.

The approach determines the team.

The business determines the outcome.

Consulting Experience

150+ **Businesses**

500+ **Founders**

across multiple industries.

Multi-disciplinary expertise

Strategy, finance, technology, marketing, operations, people and growth.

Entrepreneurial perspective

We understand the realities founders face while building and scaling businesses.

Strategy with a practical lens

Our focus is on practical strategic direction rather than theoretical recommendations.

Expert-led model

The right specialists can be brought into an engagement depending on the business requirement.

Long-term perspective

Where appropriate, Pitchvilla can continue from strategic advisory into transformation and implementation support.

Change the way you THINK. Change what your business can BECOME.

Whether the challenge is:

Growth	Restructuring	Expansion	Fundraising
Technology	Franchising	Leadership	Execution

Pitchvilla works with founders and management teams to understand the challenge, identify the strategic priorities and build a practical path forward.
